

Artic

GLOBAL EXPERTS, POWERFUL SOLUTIONS

CONSULTING

Artic Consulting solves enterprise challenges by developing solutions that meet an organization's demands more quickly, securely, and with greater accuracy. Global teams enabled by Microsoft's Power Platform, cut through the complexity of today's enterprise IT environments, with powerful tools to automate repetitive and manual tasks, rapidly develop apps, and create data-driven business solutions.

Remove Barriers to Innovation

Use solutions that improve speed and efficiency while strengthening the foundation of your organization and modernize complex processes.

Informed and Confident Decisions

Make business more productive by helping organizations make informed and confident decisions by turning data into easy-to-understand visualizations that can be made available with just a click of a button.

Global Building supply organization was stuck with a highly manual and geographically distributed process to purchase needed equipment for their teams. This included filing of paper forms with manual approval from multiple departments.

Immediate & Secure Solutions

Improve processes and reinforce business standards with automated solutions faster and more securely, reducing inefficiencies and creating new business value.

Digitizing these forms and workflows with Power Apps and Power Automate meant faster response times, helping the business increase productivity across departments.

Less Errors, Less Rework

Minimize errors and simplify processes through automation that integrates systems and data. Artic will work with your organization to establish and deploy automation on error-prone, repetitive processes that ensure less errors, less rework, and more time to focus on productivity.

**Ability to Procure Items
75% Faster**

**360 Person-Hours
saved per year**

**More productivity
Less errors**

Deploy quickly, add value continuously, and make more informed business decisions.

As a business that aims to continuously grow, accelerate the flexibility and extensibility Microsoft's Power Platform has to offer. Continuously build a stronger, well-established organization that runs in systematized and automated processes allowing yourself time to decide on more informed, data-driven business decisions.
